

GODOTCON 2026

Beyond the game

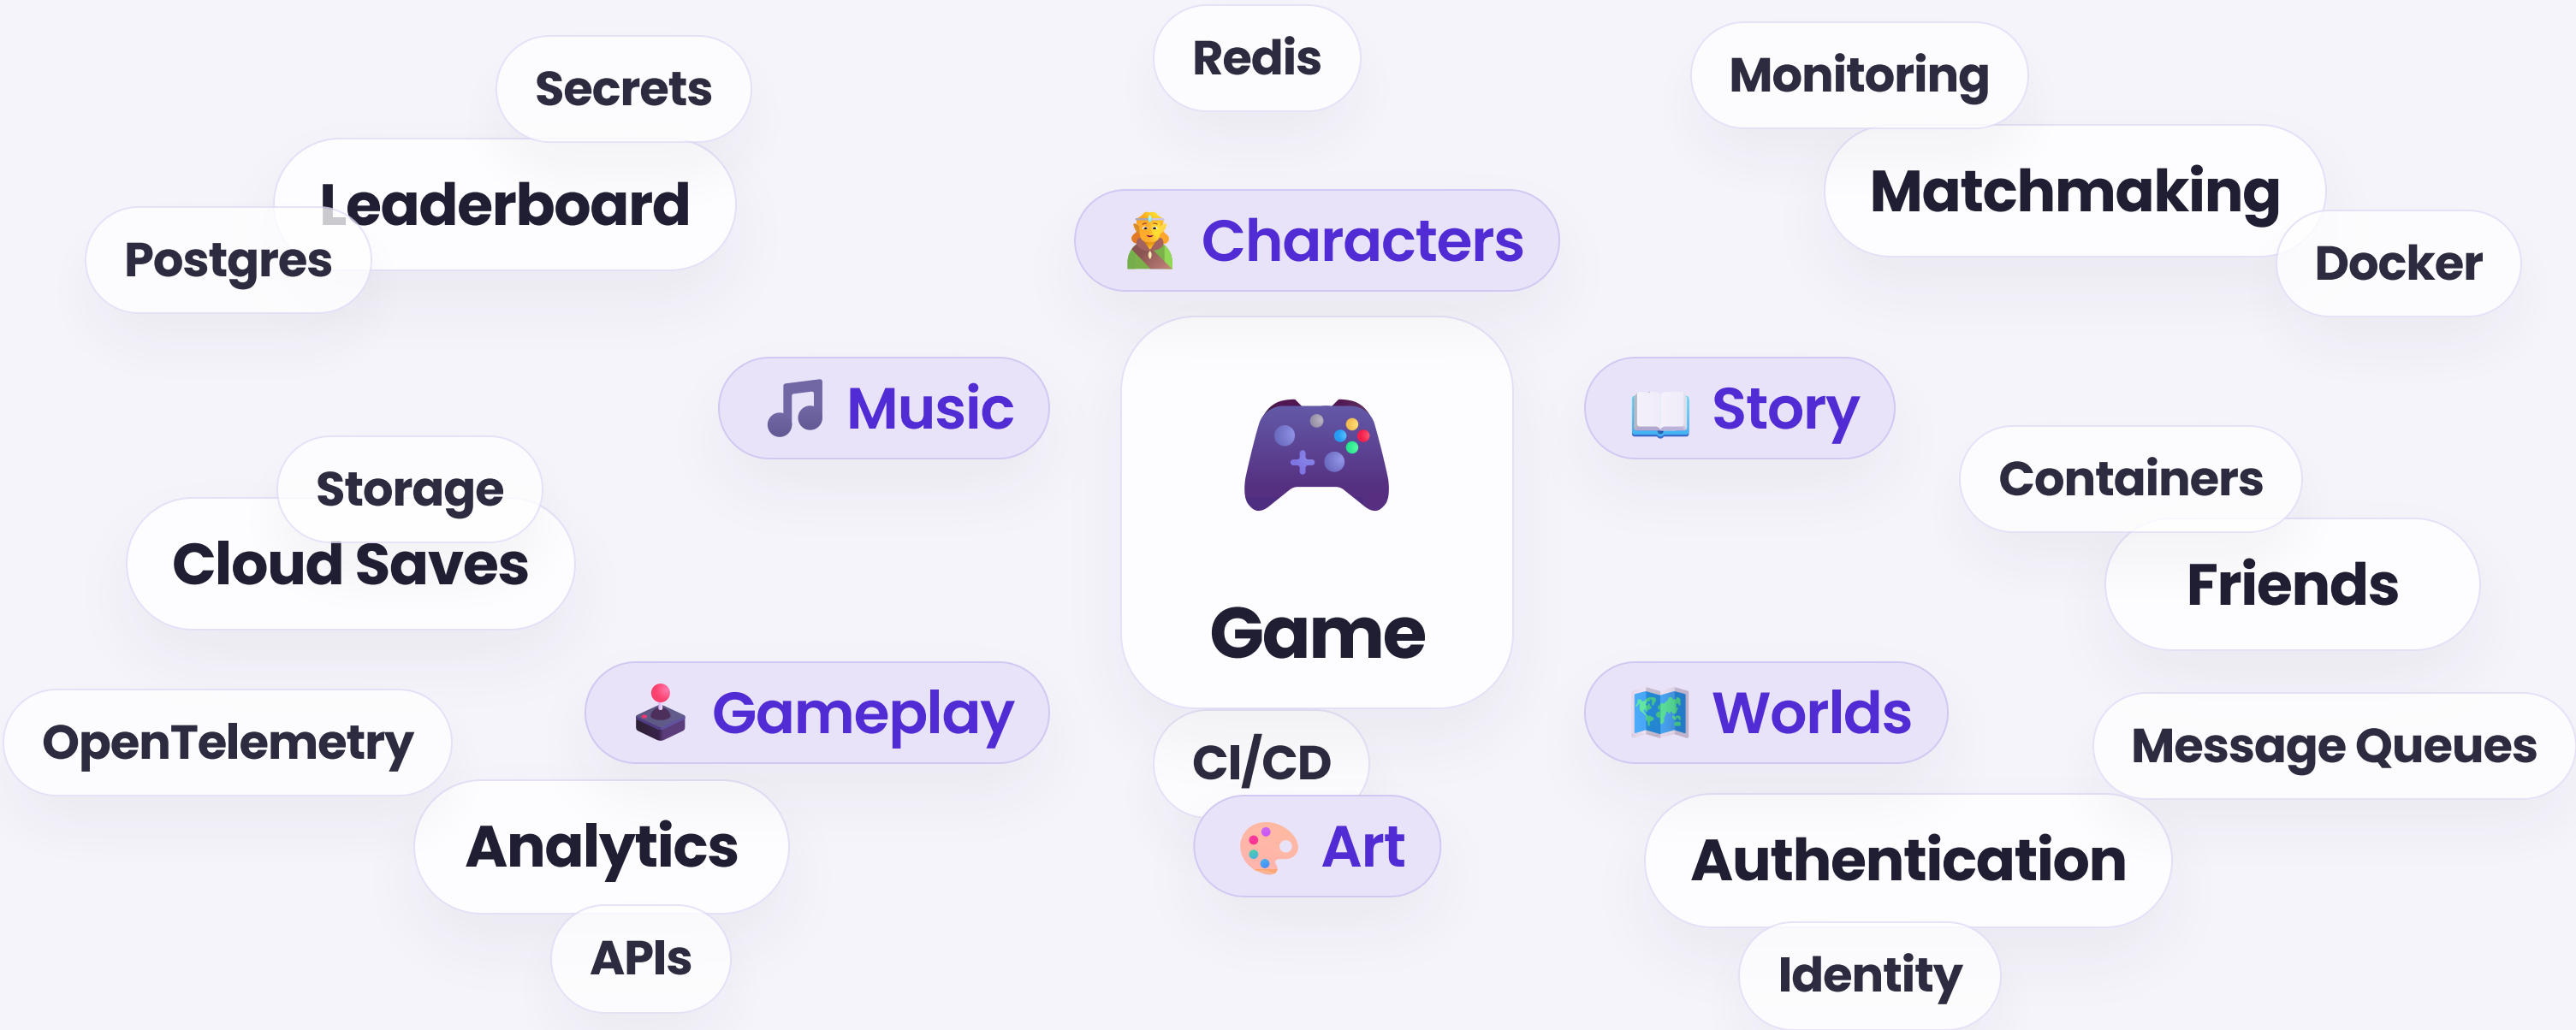

Developing your full end-to-end with Aspire

Maddy Montaquila · @maddymontaquila · @maddy.fm

**So you want to
make a game.**

SO YOU WANT TO MAKE A GAME

JUST TO PRESS PLAY

```
$ docker compose up
```

```
$ dotnet run
```

```
$ npm run dev
```

```
$ go run .
```

```
$ redis-server
```

```
$ godot --path .
```

**THIS IS
normal
now.**

**Congrats — you
built a distributed
system.**

WHY THIS MATTERS

Game dev is full-stack dev

Players see the game. Teams still own identity, game services, operations, platform paths, and the local loop that keeps all of it moving.

The hard part is not one service. It's running the whole stack together as you build your game.

Aspire is an agent-ready, code-first tool to compose, debug, and deploy any distributed app.

```
> aspire run
```

- **game-api**

- **leaderboard**

- **redis**

- **postgres**

Dashboard

Health checks

Tracing

Logs

The map.

```
var builder = DistributedApplication.CreateBuilder(args);

var db = builder.AddPostgres("postgres")
    .AddDatabase("scores");

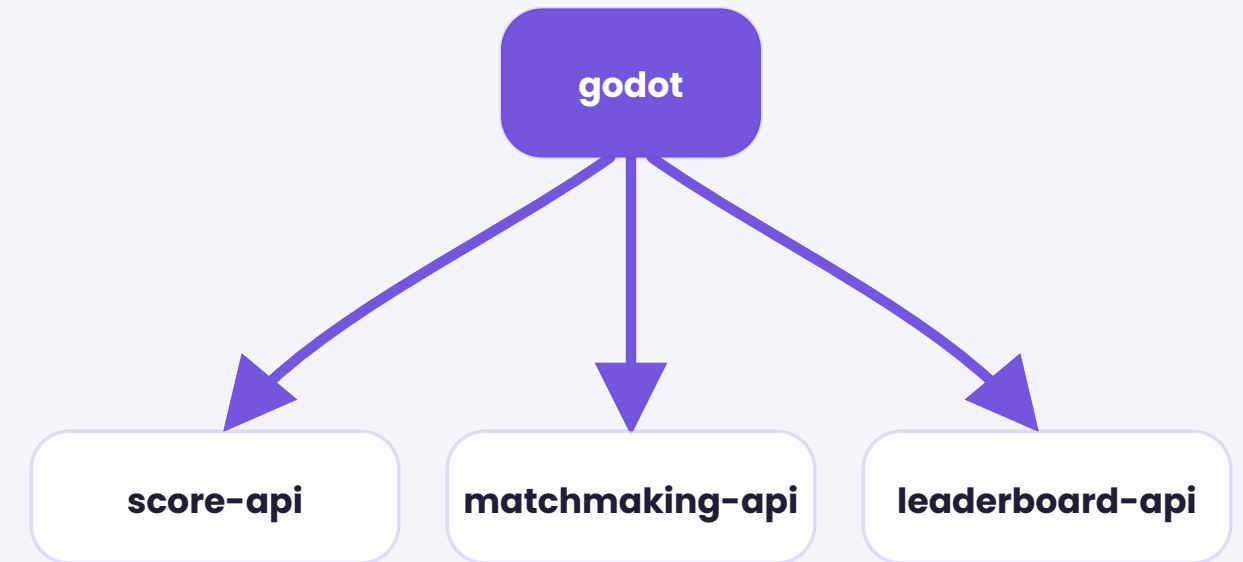

var scoreApi = builder.AddCSharpApp("score-api")
    .WithReference(db);

builder.AddGoApp("matchmaking-api")
    .WithReference(scoreApi);

builder.AddNodeApp("leaderboard-api")
    .WithReference(scoreApi);

builder.AddGodotApp("godot-snake-client")
    .WithReference(scoreApi);

builder.Build().Run();
```

A control center for the entire system.

Health

Traces

Logs

GET /leaderboard 200
cache hit
saved cloud slot

Relationships

game-api → redis
game-api → postgres

INTEGRATIONS

Building blocks. Not magic.

Redis

Postgres

Containers

Azure Service Bus

Azure Key Vault

AWS S3

AWS DynamoDB

Google Pub/Sub

Google Cloud Storage

Your existing services

Aspire works with the tools you already use.

CLI

One place to start everything.

```
> aspire run
```

```
> aspire add redis
```

```
> aspire deploy
```

One control plane for the local loop, without locking you into one cloud.

Demo

**Spend your
time making
games.**

Not infrastructure.

THANK YOU

Beyond the game
